

## ASSOCIATE IN SCIENCE

### What is an Associate in Science degree?

Interested in a career that requires a bachelor's degree? Start at OCTC and save big. An associate degree in science gives you many options in fields such as biology, chemistry and mathematics to name a few. You can start here and transfer to any public university in the Kentucky. Our students do well when they go on to 4-year

institutions, and many of them qualify for transfer scholarships.

### Transfer Options

The Council on Postsecondary Education (CPE), the universities and KCTCS joined forces to design pathways for bachelor's degree programs. That means you have assurance that your courses will transfer. A student can complete the first two years of college without committing to a particular university. With advance planning, you can save time and money. Go to [www.cpe.state.ky.us/going2/going2\\_transfer\\_planning.asp](http://www.cpe.state.ky.us/going2/going2_transfer_planning.asp) for details.

# ASSOCIATE IN SCIENCE

\*Select a course from the approved general education courses listed. See your advisor for a complete list.

\*\*Associate in Science Requirement courses should be selected in consultation with your advisor and in accordance with the requirements for your major at the college or university to which you intend to transfer. These courses must be selected from the approved lists and at least 6 of the credit hours must be from the categories of Quantitative Reasoning and/or Natural Sciences.

^Students are encouraged to choose elective courses that will fulfill pre-major requirements at their transferring institution. For assistance, please see your advisor or visit TRAC Central.

Digital Literacy is required for graduation. Competency must be demonstrated either through the completion of a course or test. For more information on this degree, contact the OCTC Counseling Center at 270-686-4527 or [octc.admissions@kctcs.edu](mailto:octc.admissions@kctcs.edu).
